Use the garden to answer the questions. You may draw on the garden!

1. Estimate what fraction of the garden is taken up by tomatoes and strawberries combined. Is it closer to 0,  $\frac{1}{2}$ , or 1? How do you know?
2. What fraction of the garden is taken up by lettuce? How do you know?
3. Write an equation to show what fraction of the garden is taken up by tomatoes and strawberries combined. Check if your answer is close to your estimate from #1.
4. Write an equation to show how much more of the garden is taken up by carrots than by lettuce.
